

Simcere Innovation, located in Cambridge, MA, aims to leverage global innovation resources in order to make better medicine available to patients sooner. We focus on the research and development of life-changing cell and gene therapies for our patients by utilizing cutting-edge technology.

Simcere Innovation provides a remarkably unique and innovative model referred to as “Internal Entrepreneurship.” This model combines research & development with investment and incubation in an effective and creative fashion that fosters growth and success. Scientists with innovative ideas and entrepreneurial passion can approach us with their business proposal. A proposal can range from a breakthrough idea, to validated preliminary scientific results, or an IND-ready project with our entrepreneurship-driven platform, we would like to be your trustworthy partner who supports the successful and efficient translation of research from the lab to the clinic.

We are looking for outstanding scientists who aspire to become entrepreneurs with creative ideas and business plans
